Research resident training

The research residency system was started in April 2001 to train young researchers in the field of basic and applied cancer researches at our research institute.

	2015 fiscal year	2016 fiscal year	2017 fiscal year
Number of research residents	12	10	8

Training of technical personnel for medical treatments

The shortage of specialized technical personnel for the treatment of cancer is an obstacle in the promotion of cancer control programs. To solve this problem, since 1966, full scale training has been provided.

The accomplishment of this Center in this area has gained an international reputation and applicants for this training course now come from various countries as well as from all over Japan.

	1966-2017 fiscal years	2015 fiscal year	2016 fiscal year	2017 fiscal year
Total	5,643	72	66	62
