

知事指定薬物一覧

	通称名	構造式等
1	CUMYL-CBMINACA	 <p>The structure shows a benzimidazole ring system. One nitrogen is substituted with a cyclobutylmethyl group. The 2-position of the benzimidazole is substituted with a carbonyl group, which is further substituted with a tert-butyl group and a phenyl ring.</p>
2	LSZ、LA-SS-Az	 <p>The structure is a complex polycyclic system. It features a benzimidazole core fused to a six-membered ring, which is further fused to a seven-membered ring containing a nitrogen atom. A piperidine ring is attached to the seven-membered ring. A carbonyl group is attached to the piperidine ring, which is in turn connected to a pyrrolidine ring. Stereochemistry is indicated with wedged and dashed bonds.</p>
3	4-fluoro-3-methyl- α -PVP、MFPVP	 <p>The structure shows a piperidine ring substituted with a propyl group and a carbonyl group. The carbonyl group is further substituted with a 4-fluoro-3-methylphenyl ring.</p>
