

Dear Resident of Aichi Prefecture,
Please double check on the following measurements on earthquake preparation.

Check on the hazard map to see the risk of disaster hazard and evacuation route to shelters in local area.

Check on how to protect yourself not only at home but also in the train or in town wherever you are in case of earthquake.

Prepare evacuation kits for carry out and evacuation supplies for home.

Prepare portable radio to gather information on disaster relief or evacuation information in case of power outage.

Check on how to use Emergency message service Dial 171 or Disaster message board (web171) to get in touch with your family members.

Secure furniture from falling or prepare as much disaster prevention as possible.

Please remain calm to take any actions. Please be alert to any announcement issued by prefecture or municipality and take necessary disaster prevention measurements.
