

■ Hydrogen Taxi Service Available to Your Hotel!

Aichi Prefectural Government is promoting hydrogen-powered taxis as part of its efforts to realize a hydrogen society and achieve carbon neutrality.

Hydrogen taxis travel longer distances each day than typical passenger vehicles and therefore consume more hydrogen, making them an effective means of reducing carbon emissions in regional transportation.

Whether for sightseeing, business, or daily travel, hydrogen taxis offer a unique opportunity to experience a hydrogen-powered society firsthand. We invite you to try this innovative and environmentally friendly mode of transportation.

*Hydrogen taxis are fuel-cell electric vehicles (FCEVs) that generate electricity from hydrogen to power the vehicle. In Aichi Prefecture, they may also be referred to as "FC Taxis."

■ Features of Hydrogen Taxi

➤ Zero CO₂ Emissions

Hydrogen taxis emit primarily water and do not produce carbon dioxide (CO₂) while driving, making them an environmentally friendly transportation option.

➤ Quiet and Comfortable Ride

With minimal noise and vibration, hydrogen taxis provide smooth and quiet rides. They are ideal for sightseeing, airport transfers, and business uses, allowing passengers to enjoy comfortable conversations inside the vehicle.

➤ Vehicle Information

Available vehicle models vary by taxi company.

Toyota Crown FCEV

- Maximum passengers: 4 (excluding driver, Best suited for up to three passengers)

Hyundai NEXO

- Maximum passengers: 4 (excluding driver)

■ How to Book a Hydrogen Taxi

A Hydrogen taxi can be arranged by contacting participating taxi companies through your hotel's front desk or concierge service or directly by phone.

When making a reservation, please provide:

- Pick-up location
- Date and time of travel
- Number of passengers
- Destination

and specify that you would like to use a hydrogen taxi.

Reservations should generally be made at least one day in advance.

Please note:

- Vehicle availability cannot be guaranteed and depends on operating conditions.
- A Hydrogen taxi currently cannot be specifically requested through taxi apps.
Please use one of the reservation methods described below.

➤ Booking Through Your Hotel

Step 1

Contact a hotel staff member, a front desk representative, or a concierge.

Step 2

Request a hydrogen taxi.

Step 3

Provide your travel date, pick-up location, number of passengers, and destination. Available taxi companies may vary depending on your hotel. Please consult your hotel's front desk or concierge for details.

➤ **Booking by Phone (Japanese Only)**

Step 1

Call your preferred taxi company.

Step 2

Inform the operator that you would like a hydrogen taxi.

Step 3

Provide your travel date, pick-up location, number of passengers, and destination.
